

Video 283: Q&A Session #88

by Wes Penre, December 4, 2021

The video to this transcript can be found on my video channel: <https://wespenrevideos.com>

This is Wes Penre. Welcome to another Q&A. Again, I've been traveling this week, so I'll post this Q&A this weekend, so I have more time to prepare for the next Singularity video. Please send more questions at wespenre2@gmail.com, and put Q&A in the subject line. Now to the questions:

QUESTION 1: I read in old texts that you cannot leave the Matrix on a low vibration. Is this also the case with exiting the Grid? If I die in a low vibrational state, can I still exit?

ANSWER: We could ask ourselves, what is high vibration, and when do we know we are vibrating high enough to be able to leave the Kenoma/Matrix? Of course, we don't have a technical equipment where we can monitor this, so we need to go by other measures. Here is my own take on it: a soul is able or ready to leave when they vibrate higher than the average mass consciousness, i.e., the human soul group, from which the Grid is kept in place through mass agreements and technology. How do you know where you are in all this? Well, how willing are you to leave? If you are completely determined, what about your attachments to this Kenoma realm? Do you feel you want to come back here because there are people, pets, or things you would miss a lot, experiences you want to encounter again, and does any of these things make you doubtful whether to leave? How much fear of the unknown have you overcome? If you ask yourself these questions and you find there is one or two you need to work on, you definitely need to do that. If you can check off all the boxes, I would suggest you're ready. But what I suggest is irrelevant, in a sense, because only *you* know when you're ready. You will feel it.

QUESTION 2: Can you please elaborate on the 9th heaven? Also, please include if it's mentioned in the WPP, and what does this heavens frequency entail?

ANSWER: I want to start with a quote from the Gnostic text, “The Secret Book of John (long version)”:

“She [Sophia] was taken up not to her own eternal realm, but to a position above her son. She was to remain in the ninth heaven until she restored what was lacking in herself.”

The way I read this (and I suggest you read the entire gospel in context) is that Sophia was elevated from the 8th Heaven, which is Orion, where she resided without her consort, to the Heaven between our Greater Universe (Orion) and the Pleroma, and that Heaven between would be the 9th. If you look at the diagram on the screen or in the transcript, you will see where the 9th Heaven would be located. In the Gnostic texts, when the *Consummation of the Age* will happen, the human soul will have different option, depending on their level of awareness and consciousness. Two options are to either go to Orion and become a creator god (as conveyed in the Wes Penre Papers [WPP]), or in some instances go to the 9th Heaven, and from there, continue to the Pleroma, the Spiritual Universe, where the Aeons reside.

In a previous video, I discussed the egg-shaped Universe we live in, also loosely called Orion. Within this cosmic egg, our entire universe is located. Again, in the *Wes Penre Papers, The Second Level of Learning*, I mentioned that the Queen/Sophia created many universes, and they come in clusters of twelve. I compared it to a pond with waterlilies. Instead, you can think of it as cosmic eggs within cosmic water—metaphorically floating around in a womb. So, our Greater Universe is just one egg, i.e., one Experiment among innumerable cosmic eggs, all with their own Experiments pending. Between the cosmic eggs/universes is the VOID or the KHAA, aka the 9th Heaven, according to the Gnostic texts and other ancient texts, such as the Vedas. So, in the WPP, the 9th Heaven is equivalent to the VOID/KHAA.

Also, keep in mind that the VOID/KHAA is everywhere within creation, as well. It’s running through us every single nano-second, even though we are living inside one of those cosmic eggs. I hope this helps.

QUESTION 3: Do we really need to find a hole in the Grid to escape after death, when we can just think ourselves being outside of the Grid? Would that work or are we still inside the Grid?

ANSWER: I am holding on to what I have suggested for years now; focus on the Grid, a hole therein, and go out. Is it possible to do it any other way, such as you suggest? Perhaps, but the reason I keep to the hole in the Grid is because that's what I've learned should be working. Other methods are unknown to me. And everybody needs to keep in mind that whatever I write, or post, are my own conclusions, and people must take it to heart, discard it, or take whatever resonates or fit in with their own mindset and conclusions. The hole in the Grid is what I personally will go for. If someone else comes to another conclusion that seems more feasible, they might want to go for it.

QUESTION 4: First, a quote from you. "...En.ki also dressed us in soul overlays (synthetic light-bodies) and sent down empty vessels to terrorize the original Namlu'u soul group, making it even more difficult to graduate. None of this existed on Tiamaat. Of course, we could feel fear and terror then, as well, but only when appropriate and as a defense mechanism, so we could act accordingly against threats..." What threats on Tiamaat are you talking about?

ANSWER: Tiamat is a wide concept. I referred to Tiamat as an exploding planet between Mars and Jupiter. Whether it is literally so, or not, is up for debate, or if Tiamat can be seen as Gaia (see recent videos on the cosmic egg concept). With that said, it is my understanding that the human experience, or Experiment, started out peacefully, told metaphorically as "when the

lion/wolf slept with the lamb.” This changed over time when Archons and others started interacting and interfering with the Experiment, and this created a harsher environment. Eventually, our Construct was created, and some Namlu’us, i.e., the human soul group living on Earth, became stuck under a Dome, created by “lofty” interference (see Genesis 1 in the Bible, for example when it comes to the Dome.)

QUESTION 5: Regarding the YT channel [godgevlamtse](#) (see transcript for link): He is a Belgian man who has reached many of the same conclusions as you have. The firmament, bigger earth (Gaia), two floods, both flat earth (Kenoma) and round earth (Gaia) etc.

I wanted to give a quick summary of what I noticed being perceived differences between your work and his channel then ask of your opinion, please.

The Belgian's contention is that flat earth and our continents exist in a settled body of water which rests in a crater (probably a result of the war of the Titans) that is surrounded by the firmament as part of the larger living library or original experiment as you stated in the WPP.

The theory is that our moon, stars, solar system, and constellations are in fact reflections of a plasma shield that surrounds Gaia with different crater locations on the ruined Tiamat, representing the actual planets or seven heavens.

This reflection hypothesis would call into question whether such star systems as Orion and Sirius exist in Sophia's universe as we might think they do. Or if the Alien Invader Force (AIF) is camped out on other parts of the bigger earth trying to invade Gaia. You said a while back the real universe could be modeled on En.ki's imitation or look completely different. Reminds me of an old song lyric, "People in the mirror, it just doesn't get any clearer."

ANSWER: Although I have not studied the information on this YouTube channel, I have heard of the crater theory before, but I have not dug into it, at least not yet. What you call "The reflection hypothesis," however, does make sense, but in general, I need to continue looking into all these things before I want to discuss them. Thank you for the tip.

QUESTION 6: It looks like combating the "plandemic" is causing lots of deaths, and that the rulers want to eliminate humanity. For those who know their home is not this construct, why would they fear so called death? According to the WPP, some of the Namlu'us also fought for their survival to continue with the experiment and to evolve. Where did they end? Did they ever graduate? No. Is humanity not going to follow the same steps as the Namlu'us?

ANSWER: Rather than eliminating humankind, I think those who succumb to the Agenda and actually die are those whose bodies cannot handle the nanotechnology that is pumped into us through vaccines and, in addition, some succumb to the bioweapon, aka COVID-19. This could be because of a compromised immune system, genetic setup, underlying illnesses, or any other number of reasons. The Elite and their lofty masters need us for the Singularity and beyond, but they might not need 7 billion people. It remains to be seen whether they will drastically reduce the world population, or not.

You are correct. There is no reason to fear death, and we who know that there is an afterlife and what to do next should not fear. However, the fear of death is perhaps the most powerful implant in the human psyche, and even those who know about life beyond 3D still might have some fear of dying. Also, it's a matter of how we die; many people are afraid of the pain that *could* be connected to it.

The rest of the population, who happily dives into the advanced technology, leading to the Singularity, will welcome "eternal life," probably. Now they don't need to be afraid of death anymore, and everything else that is promised by the Elite spokespersons seem very exciting on the surface. People will easily be hooked on this, and that does not lead to graduation.

In the Bible, it's called the *Resurrection*, and in the Gnostic texts, it's called the *Consummation of the Age*, when the Kenoma/Matrix will be consumed, and souls will need to choose where to go. They will go according to their ignorance versus enlightenment. As it was conveyed in the WPP, some will go with the Archons and their Minions (umbrella term: the *AIF*) toward their own demise, while others will go back whence they came; where they were created. This is not a graduation, obviously.

No one knows when the Consummation of the Age will happen, and what will come first; the Consummation or the Singularity.
