
Video 302: Q&A Session #99

by Wes Penre, May 20, 2022

The video to this transcript can be found on my video channel/blog: <https://wespenrevideos.com>

Welcome to Q&A Session #99! Please send in more questions to wesperne2@gmail.com and put Q&A in the Subject line, so I won't miss your questions. Yes, you can submit more than one question if you like. Here is today's session:

QUESTION 1: You and many others mentioned that low vibrational entities are not immortal beings. Since death is an illusionary concept, what would happen to the experience of these beings?

MY COMMENT: Nothing in our Kenoma Universe, or even in the Greater Universe (Orion) is truly immortal, except humans. The reason is that we are spirited, and Spirit is immortal. Many say that souls are immortal, but they are not—they only exist if the Universe exists because souls were created in the energetic universe and lives and dies with it.

Everything that lives must have some form of soul energy that ignites it. Some souls were and are created by Sophia, aka the Orion Queen, while others were created by Yaldabaoth, the Chief Archon. These souls were created within the Kenoma, and when the Kenoma is destroyed in the Consummation of the Age (see the Gnostic text, "On the Origin of the World"), these souls will be destroyed, too, in the process.

But there are also other kinds of souls, which are the most common. These are all the numerous souls that inhabit the Universe at large. They are souls, also created by Sophia, but they lack Spirit.

It's not so much about how high or low we vibrate—that doesn't determine what kind of soul we have. A spirited soul can also, because of life circumstances, have a low vibration, until they start the healing process.

Anyway, souls within our Construct that have been hijacked by Yaldabaoth are, just like us, caught up in the recycling system and consider themselves being humans, although they are not. It is uncertain whether these souls are allowed to "advance," i.e., "ascend" through the archontic Heavens, or if they are forever caught in the recycling process, but I would assume they are also allowed to ascend. Just like us, they can if they wish, leave through the Grid.

Those with an artificial soul, created by the Archons, might have only one life. There might not be an afterlife for them. Some, but not all, in the upper echelon of the Global Elite may fall under this category.

There are a fourth category or people on Earth, which are the NPCs (Non-Player Characters), who look and act like humans but are not. They are most likely just artificial intelligence, implanted here to distract evolving humans, just like in the movie, "The Truman Show."

QUESTION 2: In the Wes Penre Papers (WPP), I believe it was level 2, you talked about your brief interaction with Utu Shamash, and he had a message or statement to humanity from the King of Nibiru which could be summed up as Annunaki/Archon propaganda. How scared were you? This must have been a nearly terrifying ordeal communicating with Utu who is Belias/Marduk.

MY COMMENT: I discussed this incident in the WPP, Level 1. I am correcting you on this for a specific reason, which I'll get to in a minute.

When Utu contacted me, I was shocked at first. I knew he was a so-called "Anunnaki," but I did not know that he was the same being as Marduk at that time. But oddly enough, I was not really afraid of him, for some reason. Up to this day, I don't know why. I think I managed to handle the situation fairly well.

It was not until I had started working on Level 2 and started connecting the dots together with someone who is from Orion that I realized that Utu and Marduk are one and the same under different titles. When I came to this insight, it was quite sobering, though.

QUESTION 3: Can a child within the Global Elite or even Global Elite members themselves learn to develop "compassion and empathy"? I know the Elite lack these things, just like the archons, and just like the artificial soul, but is it possible for them to attain these very "human" attributes? I heard in a

talk/session with Laura Eisenhower that she can deprogram certain individuals and I'm assuming the mentioned above is what she's talking about. What are your thoughts about this?

MY COMMENT: It depends. Based on my research, the Global Elite comprises of non-spirited beings. Many of them probably have an artificial soul. If they are truly equipped with Sophia's soul creation, they have a chance to redeem themselves and repent, but if they have an artificial soul, they can't. Then they completely lack emotions of their own. Many people we consider narcissists and psychopaths most likely fall under this latter category. I personally know of narcissists who have said they don't have a "core being." In other words, they are their programming, but there is nothing in the "center;" only void. These are most likely, or in most cases, artificial souls.

QUESTION 4: Will Enki be the one to initiate the attack on Orion, if so, what will be the consequences for his minions the construct and others that may still be in the construct?

MY COMMENT: Yes, En.ki/Yaldabaoth will be the initiator of the attack. I assume you are asking about what will happen if the Archons lose the war against Orion. The Construct will dissipate and dissolve, and the minions, aka the Global Elite and those who have served the Archons will get a last chance to redeem themselves and repent, but it must be sincere, of course. Not just because they are afraid of being punished.

Others, who might still be within the Construct, will also get a chance to redeem themselves and to repent.

QUESTION 5: Since the Kenoma will be destroyed and Earth will be merged back to Gaia, how will the Divine Forces revert the contamination of Nature on Earth? Will it be through Orion Technology or other means?

MY COMMENT: Life on Earth, since Yaldabaoth took over, has been carbon based. However, life outside the Earth Construct (on Gaia) is silicon based. I don't know how this will be dealt with, but I would assume there is some terraforming that needs to be done. However, when this Construct falls apart, much of Nature will probably go back to being silicon automatically, only from being less dense. If technology needs to be involved, it's going to be Orion technology—yes.
