

Transcript of a YT video called “20 Facts About Archons That You May Not Have Known”

YouTube Channel: P.S. Montgomery / The Afterlife Discussion

<https://www.youtube.com/watch?v=diAr9YJgCV0>

Here are 20 facts about Archons that you may not have known.

Fact One: Archons Are Real

Archons are real. They're not mythical creatures. They're not figments of one's imagination. They are 100% real. We just can't see them with our naked eye because they primarily reside on a different plane of existence than us. But they are real and they impact our reality on a spiritual, energetic, and vibrational level. Their existence is proven by their effects rather than direct sight.

Fact Two: They Feed on the Loosh Energy

They feed on the loosh energy that we all produce around our physical bodies. Archons feed on the emotional and spiritual energy that we produce, things like fear, guilt, anger, even intense love or grief. This energy isn't just internal, though. It radiates around us like a subtle field. Archons don't eat food. They consume loosh energy as if it were a life force instead. And because so much of human life is driven by strong emotions, especially pain, it makes us kind of like an energy farm for them.

Fact Three: The Archons Can't Force Us to Do Things

The Archons *can't force us* to do things. They can only *influence* us to do things. Archons don't have direct control over us. They're not like puppet masters or anything like that. Their influence is more through suggestion, making us feel things that lead us to certain actions. They're like masters of persuasion, not command. They make us choose what *they* want, but with us thinking it's *our* idea.

Fact Four: You Can Overcome Their Influence Using Your Power of Will

You can overcome their influence using your power of will. In the face of Archon influence, the key is our own free will and inner resilience. Recognizing their tactics and being mindful of our thoughts and emotions puts us in power to resist and ultimately overcome. Our will is stronger than they want us to believe. It's all about using our autonomy to shape our actions and experiences, not falling into the patterns that they want us to.

Fact Five: They Can Assume Many Forms

They can assume many forms. Archons are known to wear many shapes and disguises to influence us. They can appear as people, angels, deities, and even as extraterrestrials.

Sometimes they're visible, and sometimes they're invisible, using whatever form serves their purpose. Their versatility and form is part of their power to deceive and control. Don't let appearances fool you, though. The essence behind them remains the same.

Fact Six: They Have a Connection to the Spiritual Realm

They have a connection to the spiritual realm. Archons aren't physical. They exist primarily in the spiritual or lower astral realms. They're non-corporeal entities with deep access to subtle energies and psychic fields. This gives them influence over thoughts, dreams, and even spiritual experiences. Because they operate beyond the material world, their connection to the spiritual realm is how they shape beliefs, manipulate religions, and feed off human energy without being seen.

Fact Seven: They Will Attack Native, Tribal, and Spiritual People

They will attack native, tribal, and spiritual people like the American Indians, Aboriginals, and even Africans. Archons have targeted indigenous cultures throughout history. They'll often use traditions, beliefs, or ceremonies to deceive and manipulate. Their goal is to corrupt authentic spirituality with false teachings, making native people believe their own practices such as voodoo, hoodoo, and wicca are actually dark or evil. They want to replace ancient wisdom with their own control.

Fact Eight: They Will Use Trigger Words, Whisper Tones, and Sounds and Music Against Us

They will use trigger words, whisper tones, and sounds and music against us. Archons can use a mix of trigger words, whisper tones, and certain sounds or music to influence human emotions, thoughts, even subconscious actions. They like to tap into patterns and associations like music, sounds, or specific language to make us think and feel certain ways. It's like a form of subliminal control, and it's pretty effective. This kind of manipulation can happen without us even realizing it.

Fact Nine: They Will Attack You While You Sleep and Are in the Dream State

They will attack you while you sleep and are in the dream state. While we dream, we're more vulnerable. Archons can take advantage of this by manifesting into dreams or even influencing them, playing on your fears, emotions, and even your insecurities. They use this subconscious state when people are more open to suggestion to manipulate us and gain influence. It's like they use dreams as a backdoor into the mind when we're most susceptible. It's a sly strategy that takes advantage of this vulnerable space.

Fact Ten: Archons Rule with Fear and Try to Terrify and Intimidate You

Archons rule with fear and try to terrify and intimidate you. Archons, especially Yaldabaoth, the chief Archon, rule with fear. They'll try to scare and intimidate people into compliance. By making people feel helpless and fearful, they keep them under control. It's a way of asserting dominance over people and preventing people from questioning their power.

Fact Eleven: We Are All Susceptible to Archon Hosting

We are all susceptible to Archon hosting. And if in tune, you will notice this. Here's the thing. We're all susceptible to Archon hosting. And if you're in tune with yourself and aware, you might start to notice strange feelings, ideas, or even behaviors that don't feel quite like your own. These are absolute signs of Archon influence. The key is self-awareness. Recognizing what's you and what's them.

Fact Twelve: When You Feel a Static Feeling Up Your Legs and Back

When you feel a static feeling up your legs and back, that means the Archons are near you. When you feel a static-like feeling or sensation moving up your legs and back, it might be a sign of Archon proximity. It's like a physical reminder of their presence, a chilling feeling that something isn't quite right. This kind of sensation can be a way your body responds to their energy.

Fact Thirteen: Archons Can Indeed Read Your Thoughts

Archons can indeed read your thoughts. They can because they operate on the same energetic and mental frequencies that you do. They don't need to listen. They perceive directly from your mind's energy field. That's why inner awareness and guarding your thoughts are so important.

Fact Fourteen: Archons Can Manipulate TV, Radio, and Mobile Devices

Archons can manipulate TV, radio, and mobile devices and use it against us. Archons can manipulate technology like TVs, radios, and phones. They can use these tools to influence us. They do this by messing with electronic signals or by playing with the programming or even by using subliminal messages or sounds. Archons use the technology against us to control what we see or hear. It's just another sneaky way that they try to manipulate people.

Fact Fifteen: The Archons Can Possess Your Family, Friends, and Loved Ones

The Archons can possess your family, friends, and loved ones to get a rise out of you. They'll play mind games and even make them do things that get under your skin. They want a reaction from you. Archons will even possess strangers as well as a way to get a reaction or rise out of you. The goal is to make you feel angry, frustrated, or out of control. That's how they get you emotional and distracted.

Fact Sixteen: Archons Need Us. We Don't Need Them

The Archons need us. We don't need them. The Archons depend on human energy, fear, guilt, suffering to survive. We fuel them without even knowing it. But they *can't exist without us feeding that energy*. On the other hand, *we don't need them at all*. In fact, we're stronger and freer when we break free from their influence.

Fact Seventeen: The Archons Hate Orgonite, Laughter, Love, Caring, Compassion, and Consideration

The Archons hate orgonite, laughter, love, caring, compassion, and consideration. Archons hate orgonite, which are devices that transmit orgone energy. They also hate laughter, love, compassion, and any form of positive human interaction. They despise these things because

they're the complete opposite of what the Archons feed on: fear, suffering, and negativity. These qualities actually weaken their control and presence.

Fact Eighteen: Drugs and Alcohol Give Archons a Better Chance to Attack

Drugs and alcohol give Archons a better chance to attack and/or host a person. Drugs and alcohol can and does affect your state of mind and your body, making it easier for the Archons to attack or host you. They just love when we're inebriated because then it's much harder to defend yourself. Staying sober keeps you stronger and more aware.

Fact Nineteen: Past Traumas and Tragic Events Leave Open Doors

Past traumas and tragic events in your life leave open doors for the Archons to enter. Past traumas or tragedies, pain and hurt that haven't been worked through leave open doors for the Archons. The pain opens up your energy field, making it *much easier* for them to attach to you. Dealing with trauma and healing your wounds, especially through forgiveness, closes off all entry points.

Fact Twenty: Although the Archons Are Nasty, Hating Them Only Manifests the Same Problem

Although the Archons are nasty, hating them only manifests the same problem. The Archons are malicious and deserve your frustration, but hating them only gives them more fuel. Rather than feeding their vibe with your own hate, find a way to stay grounded and not get too negative at their actions. Staying strong, informed, and compassionate is more empowering than just hating them back.

So now you know a lot more about the Archons, and these are all things that you all definitely needed to know. So, before you go, for our buddies on TikTok, if you like this type of content, feel free to subscribe to P.S. Montgomery's YouTube channel for more videos just like this. And for those on YouTube, don't forget to like. And if you want, you can discuss this video in the comment section. And yeah, until next time, ladies and gents.
